COUNTING THE COST Financing Asian Higher Education for Inclusive Growth

2012-01-01 2012-01-01 File Name: B00XKG2FWM | File size: 43.Mb

From Asian Development Bank : Counting the Cost: Financing Asian Higher Education for Inclusive Growth (Higher Education In Dynamic Asia: Study Reports) before purchasing it in order to gage whether or not it would be worth my time, and all praised Counting the Cost: Financing Asian Higher Education for Inclusive Growth (Higher Education In Dynamic Asia: Study Reports):

Higher education (HE) systems in Asia have expanded rapidly over the past decade. This includes the rise of private HE institutions (HEIs) and privatization of public sector HEIs. This HE massification has stretched the capacity of

governments and agencies to address the cost, financing, equity, and quality implications of expansion. This publication reviews the key aspects of HE costs and financing, considering Asia's framework on inclusive growth from the perspective of disadvantaged students such as the poor, women, ethnic minorities, and students from rural areas.
