**Pushkala Prasad : Crafting Qualitative Research: Working in the Postpositivist Traditions: Working in the Postpositivist Traditions** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Crafting Qualitative Research: Working in the Postpositivist Traditions: Working in the Postpositivist Traditions:

2 of 2 people found the following review helpful. Good reference but lacks breadthBy SDI thought the Prasad book was a good reference, though sometimes I would not get the depth and breadth of detail on a particular topic I was

interested in reading more about. 0 of 0 people found the following review helpful. Five StarsBy CustomerExcellent  
of 1 people found the following review helpful. Useful to open mindsBy Catia Silva da Costa Moreira SchottGreat  
book to understand how to congregate theories, philosophies and methods in postpositivist researchs. Very useful to  
open mind. I recommend for doctoral students.

Courses in management research have traditionally focused on quantitative techniques, and no available text adequately covers the many different perspectives within the qualitative model or shows which qualitative techniques work best in different settings. "Crafting Qualitative Research" fills this need. In clear and readable prose, this comprehensive text offers a detailed guide to the rich diversity of qualitative research traditions, with examples and applications specifically designed for the field of management. Each of the book's four main sections includes a descriptive "tree" diagram that lays out the historical origins of that section's traditions. Each chapter is devoted to a specific methodology and includes historical origins and development; techniques and applications; current controversies and emerging issues; and a summary box highlighting that method's utility. With its detailed and easy-to-understand coverage, this will be the text of choice for any instructor who wants to include the qualitative approach in a research methods course, as well as a useful resource for anyone doing research in the post-positivist traditions.

"For too long all non-quantitative research has been treated as a single category: qualitative. However, the diversity of assumptions and method that exist within this category is huge. Crafting Qualitative Research is the book we have been waiting for - an approachable, articulate mapping of these very different traditions of research. Both students and experienced researchers will benefit from reading this text." - Ralph Stablein, Massey University "This fine book brings new insight to the diversity that exists within the traditions of qualitative research. Professor Prasad is deeply conversant with the philosophical perspectives that undergird the disparate research traditions, as well as with the differences in technique that are observed in practice. The result is a book that is of immense value to the teaching and learning of qualitative methods." - Eileen Fischer, York University "About the Author Pushkala Prasad is the Zankel Chair Professor of Management and Liberal Studies at Skidmore College, USA.
