From Asian Development Bank : Developing South Asia: Lessons and Insights before purchasing it in order to gauge whether or not it would be worth my time, and all praised Developing South Asia: Lessons and Insights:

This publication showcases eight projects that delivered exemplary and significant results in their implementation. These projects represent various sectors such as energy, urban development, transport, information and communications technology, irrigation, and disaster risk reduction. This publication identifies lessons learned and highlights good practices that can be replicable across South Asia.
