Arpita Banerjee, Pravat Kumar Kuri : Development Disparities in India: An Enquiry into Convergence (India Studies in Business and Economics) before purchasing it in order to gage whether or not it would be worth my time, and all praised Development Disparities in India: An Enquiry into Convergence (India Studies in Business and Economics):

This book highlights the development disparities in India and considers three complex areas of development – economic wellbeing, human progress and agricultural development – over a period of forty years since the 1970s. The novelty of the book lies in its rich analytical foundation and the use of sophisticated statistical and economic tools to determine the causes of socioeconomic disparity between Indian states. The trends of inequality, polarization and disparity are highlighted with regard to income, human development indicators and agricultural production and productivity. The book also identifies the factors underlying divergence in economic and social activity in India and provides policy suggestions for bringing about more balanced and inclusive development in India.

From the Back Cover This book highlights the development disparities in India and considers three complex areas of development – economic wellbeing, human progress and agricultural development – over a period of forty years since the 1970s. The novelty of the book lies in its rich analytical foundation and the use of sophisticated statistical and economic tools to determine the causes of socioeconomic disparity between Indian states. The trends of inequality, polarization and disparity are highlighted with regard to income, human development indicators, and agricultural production and productivity. The book also identifies the factors underlying divergence in economic and social activity in India and provides policy suggestions for bringing about more balanced and inclusive development in India.

About the Author ARPITA BANERJEE is an academician and researcher. She is Head of the Department (Economics), M.U.C. Women's College, Burdwan and has been teaching for more than 10 years. She did her Post Graduation from the University of Calcutta and M.Phil from Jadavpur University, Kolkata. She obtained her PhD degree from the University of Burdwan. As an academician, Dr Banerjee specializes in statistics and econometric analysis and planning and development economics, she has been teaching papers of micro and macro-economic theories, development policies, Indian economic planning and statistical analysis to students of economics honours. She is a member of Bengal Economic Association. She has presented a number of papers in several national and international seminars and conferences and has many publications in refereed journals and proceedings. Her areas of interest are development economics, regional disparity, agricultural economics and environmental economics.

PRAVAT KUMAR KURI was born and educated in West Bengal. He obtained a Master's degree in Economics from the University of Burdwan.
