From Asian Development Bank : Development of Environmental Laws and Jurisprudence in Pakistan before purchasing it in order to gage whether or not it would be worth my time, and all praised Development of Environmental Laws and Jurisprudence in Pakistan:

The Government of Pakistan has adopted laws to combat adverse environmental impacts of unsustainable development, but there are several issues that make effective implementation of these laws and adjudication of environmental disputes difficult. This report examines the state of environmental law, adjudication, and implementation in Pakistan, focusing on the provincial environmental protection acts of Pakistan and the institutional design, principles, and procedures provided under the law. It further examines the actual implementation of the law and the case law developed in this area with focus on the courts' interpretation and enforcement of the laws. The report also reviews the curriculum of law schools and judicial academies and suggests the future inclusion of

environmental laws in their respective programs.
