Creative and spot on look at Female leadership By Jstein Karin has done a masterful job of providing a framework from Dante's Comedia for the developmental path of women in leadership. You are caught up in a guided imagery of looking at your own opportunities for insights and personal growth and realizing how we're all challenged by many of the same vices and virtues. It joins my list of core books and I will return to it again and again!

This book explores the nature of female leadership and illustrates how women may seek to renew the very notion of leadership through their own personal development. Offering a psycho-spiritual examination of Dante's journey through Purgatory and the seven sins and virtues, the book discusses the process of overcoming the tension between inner motivations and outer expectations through personal development in order to achieve true leadership. Topics include: the process of personal transformation using Dante's description of the seven sins and virtues the value of psychology and spirituality for women in leadership roles the new vision of leadership that meets present global demands for social cohesion and sustainability. Female Leadership will be of great interest to all professionals who wish to familiarise themselves with personal leadership development and learn how Jungian theory has been put into practice in this field, as well as to leaders in corporate and non-corporate organisations.

"In this work Karin Jironet offers all of us guidance in moving toward a goal that is fresh and new — spiritual and psychological leadership within the difficult and confining spaces of modernity but also based rigorously upon ancient psychological and spiritual principles." — Murray Stein, from the Foreword. About the Author Karin Jironet is a theologian and Jungian psychoanalyst working with executive leadership development, both individually and in groups.
