Taco C.R. van Someren, Shuhua van Someren-Wang : Innovative China: Innovation Race Between East and West (Management for Professionals) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Innovative China: Innovation Race Between East and West (Management for Professionals):

China is trying to turn its labor, capital and resources intensive, lower added-value and export dependent growth into a sustainable innovative economy. This is changing the world's power balance and has sparked a race between East and West in knowledge-based, high added-value economic innovation. Inspired by their extensive experience in doing business with China, the authors show how the US, the EU and China have reached a crossroad where ten battle fields decide about their future earning capacity and prosperity. Whether China will be a threat or an opportunity depends on the main players in government, public and private organizations rethinking their innovation policies and paths of business development. This book offers a new view on innovation which can be applied by corporate leaders and policy makers to get ready for the future. ?
