Graham Dutfield : Intellectual Property Rights Trade and Biodiversity before purchasing it in order to gage whether or not it would be worth my time, and all praised Intellectual Property Rights Trade and Biodiversity:

This text examines the international agreements governing trade in genetic resources - crucial resources for world agriculture, food security and large industries such as pharmaceuticals. Intellectual Property Rights (IPRs) in these resources are critical for those involved in the trade, including industry and developing countries. The book analyzes the Convention on Biological Diversity (CBD), World Trade Organization agreements and other agreements. It explains how they can be integrated into an equitable training regime.

"...an excellent review of the issues and an invaluable resource for all those who want answers to this elusive topic." -- Calestous Juma, former Executive Secretary of the Convention on Biological Diversity
About the Author
Graham Dutfield is Senior Research Fellow at Queen Mary College London. He is co-editor of *Trading in Knowledge* (2003,) and *Intellectual Property Rights, Trade and Biodiversity* (2002).
