**Daniel Gervais : Intellectual Property, Trade and Development** before purchasing it in order to gage whether or not it would be worth my time, and all praised Intellectual Property, Trade and Development:

This work responds to the increasing need in many countries to better understand linkages between intellectual property, trade rules, and economic and social development, and to find new ways of implementing intellectual property rules and optimizing their effects. It provides a comprehensive analysis of the latest legal, economic, political

and social research and advanced current thinking on the relationship between intellectual property and trade and development. With new chapters addressing access to educational resources and innovation in the developing world, the use of traditional knowledge as a source of innovation, and TRIPS, TRIPS Plus and Developments across the whole of South Asia, this fully updated second edition presents new insights and discussions from economists and social scientists and benefits from access to the latest metrics and analytical tools available.

About the Author Daniel Gervais, Professor of Law, Co-Director of the Intellectual Property Program, Vanderbilt University Law School
