David Orrell : Introducing Economics: A Graphic Guide (Introducing...) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Introducing Economics: A Graphic Guide (Introducing...):

1 of 1 people found the following review helpful. Good overview of history without much depthBy Debra CassaraBroad but not deep. Good to keep on my desk as a concise overview of the history of economic thought.5 of 8 people found the following review helpful. i love the INTRODUCING SERIESBy Amorthe good thing about this INTRODUCING SERIES they are graphical guides, which makes it easy to read.another thing the way things are explained are in a fun historical way that attracts you to go on about reading.basically with this book you can get a gud grasp of what economics are, how it started and how is it in our lives. u can finish the book in no time, jjust give your self teh time to read it properly.2 of 5 people found the following review helpful. Only Readable w/ a Magnifying

Glass! By Kate Love
The font in this book is nightmarishly small and the margins are huge. This book has been a complete disappointment, which is sad because the materials look like I would have really enjoyed it if I could read it without a magnifying glass.

Brand-new INTRODUCING guide to the subject that really makes the world go round. Economics was described by the English economist Lionel Robbins in 1935 as 'the science of scarcity' but these days economics is everywhere, and it's never been more popular - as bestselling books such as *Freakanomics* attest. But what is economics really all about? What do the great economists think, and what can economics do for us today? David Orrell, author of *Economyths*, explains all in *Introducing's* trademark intelligent but witty style, accompanied by brilliant illustrations from the legendary Borin van Loon.

David Orrell is a Canadian mathematician who lives in Oxford, where he also obtained his doctorate. His work in the prediction of complex systems such as the weather, genetics, and the economy has been featured in *New Scientist*, the *Financial Times*, BBC Radio and CBC TV. His previous book was *Economyths* (Icon, 2010).
About the Author
David Orrell is a Canadian mathematician who lives in Oxford, where he also received his doctorate. His work in the prediction of complex systems such as the weather and climate has been featured in *New Scientist*, the *Financial Times*, BBC Radio and CBC TV. He was a finalist in the 2007 Canadian Science Writers' Association book award. His most recent book was *Economyths* (Icon, 2010).
Borin Van Loon has worked on numerous *Introducing* titles. He is a freelance illustrator, surrealist painter, and collagist.
