D. Coles, G. Bailey, R E Calvert : Introduction to Building Management before purchasing it in order to gauge whether or not it would be worth my time, and all praised Introduction to Building Management:

This is the classic practical introduction to the broad principles of building management. It is suitable for both students and practising construction professionals who are concerned with greater efficiency within the construction industry.

As a general textbook for the student, the introduction covers the entire field in some depth providing a firm foundation for additional reading. The text is closely geared to the chartered Institute of Building (Member) Parts I and II examinations. The book includes examples based upon and related to working experience. It will also be found valuable by students reading for the examinations of other professional bodies in the construction industry, and by HNC/D students.
