Lorna Guinness : Introduction To Health Economics (Understanding Public Health) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Introduction To Health Economics (Understanding Public Health):

1 of 1 people found the following review helpful. A perfect size beautiful bookBy Baljit SinghIt is a perfect size beautiful book, simple to understand, and chapters are neither short, nor long. A section on activity and feedback is quite impressive and lively to the readers and builds up the levels of confidence by understanding simple questions and answers relevant in our day to day life. Economics is about making good choices and the book serves the purpose of using health resources appropriately in all contents of the book. A simple observation is more than enough to provide good health care by knowing the methods of economics and principles. The first and ultimate lesson of economics still revolves around the principle of opportunity cost whether markets or trade or health care. To get 5 stars, further

improvements shall be made, which authors do time-to-time when their readers give feedback, leading to the next edition, in this case, the third edition of the book. It is a very good book.0 of 0 people found the following review helpful. Four StarsBy Izabela D.very easy to follow, even if the content is dry. Lots of examples and problems to work through.0 of 0 people found the following review helpful. great book for non-econ but health administration/management/leadershipBy tom samuelUsed the book at the University of The Gambia (UTG) for MPH/MSPH students. Text was helpful to me as faculty to organize and present the material. The problem: no text books for the students - but the concepts and references were extremely important and useful for students with limited exposure to economics and business.

This practical text offers the ideal introduction to the economic techniques used in public health.

About the AuthorLorna Guinness is a lecturer at the London School of Hygiene and Tropical Medicine, UK and Visiting Research Fellow at the Australian National University, Australia. Virginia Wiseman is a senior lecturer at the London School of Hygiene and Tropical Medicine, UK.
