AndrAtilde;copy; Martinuzzi, Michal Sedlacko : Knowledge Brokerage for Sustainable Development before purchasing it in order to gage whether or not it would be worth my time, and all praised Knowledge Brokerage for Sustainable Development:

The menace of a post-truth era challenges conventional policy-making and science. Instead of fighting an uphill battle against populist solutions, those involved in both policy-making and science have to find innovative ways to

collaborate, and make use of the vast amounts of knowledge that are already available. Knowledge brokerage, in this context, is more than a simple question-and-answer game: it is a process of co-creating and re-framing knowledge.

About the Author
Andrea; Martinuzzi is head of the Institute for Managing Sustainability, associate professor at WU, has a postdoctoral lecture qualification (*venia docendi*) in Environmental Management and Sustainable Development Policy and has led several EU-wide research projects. He coordinates one of the FP7 knowledge brokerage projects (RESPONDER) and is work package leader in another one (CORPUS). His research areas are sustainable development policies, evaluation and monitoring and knowledge brokerage. Michael Sedlacko studied economics and environmental policy before joining RIMAS. He also worked as project staff at the UNDP, programming and monitoring consultant for the Slovak Government, facilitator and trainer at national and international events with civil servants as the target audience, and guest lecturer at the Institute for Public Policy of the Comenius University in Bratislava, Slovakia. His research interests include governance for sustainable development, evaluation research and ecological macroeconomics.
