This provocative book combines theory and practice and is the first of its kind to develop a complete model of the project leader function in modern corporations. It addresses such diverse, but equally important, roles of project leader as visionary, strategic manager and ethical leader. It is a hands-on guide detailing the specific steps you will need to follow in creating a project vision, reaching all project stakeholders and selling that vision. You will also learn about a wide range of leader duties-manager, problem solver, facilitator, trainer, communicator, advocate-and discover how each duty affects your ability to create a cohesive project team.
