From Routledge : Property Rights in Land: Issues in social, economic and global history (Perspectives in Economic and Social History) before purchasing it in order to gage whether or not it would be worth my time, and all praised Property Rights in Land: Issues in social, economic and global history (Perspectives in Economic and Social History):

Property Rights in Land widens our understanding of property rights by looking through the lenses of social history and sociology, discussing mainstream theory of new institutional economics and the derived grand narrative of economic development. As neo-institutional development theory has become a narrative in global history and political economy, the problem of promoting global development has arisen from creating the conditions for institutions to take root in the global economy and in developing societies. Written by a collection of expert authors, the chapters delve into social processes through which property relations became institutionalized and were used in social action for the appropriation of resources and rent. This was in order to gain a better understanding of the social processes intervening between the institutionalized rules of the game; and their economic and social outcomes. This collection of essays is of great interest to those who study economic history, historical sociology and economic sociology, as well as Agrarian and rural history.

About the Author Rosa Congost is Full Professor in economic history and researcher of the Centre for Research in Rural History at the University of Girona, Spain and ICREA Academy Researcher. Jorge Gelman is Senior Researcher and current Chair of the Instituto Ravignani, Universidad de Buenos Aires/CONICET, and Full Professor in history at the Universidad de Buenos Aires, Argentina. Rui Santos is Associate Professor in sociology and researcher at CICS.Nova and IHC at the Nova University of Lisbon, FCSH/Nova, Portugal.
