Marilyn V. Lichtman : Qualitative Research in Education: A User's Guide before purchasing it in order to gauge whether or not it would be worth my time, and all praised Qualitative Research in Education: A User's Guide:

1 of 1 people found the following review helpful. Great Book for anyone is learning about qualitative research:)By Georgette KearneyIf you are a first year student in a graduate program, I would highly suggest you get this book because it will make your life so much easier when it comes to stats or if you are just wanting to learn about qualitative methods period. I love that the author give their personal stories to align with the chapters that she is discussing and allows us to think about our everyday interactions and how they affect our research. It is a very simple read that anyone can read if they want to know more about the field of qualitative research. As a first year doctoral student, this is helping me pass all my classes and helping me prepare for the stats part of my dissertation. Even when I become a professional, I will recommend this book to my students because again, it is a simple read which breaks down the hard subject of qualitative research. This book will sit on my desk to help me refresh myself about the various rules and methods concerning qual research.1 of 1 people found the following review helpful. I liked the

textBy CustomerI liked the text. It is highly informative and straight-forward. I am looking forward to more authors explicitly writing what is really so.0 of 0 people found the following review helpful. Everything you want to know about Qualitative ResearchBy Bo CobarrubiasThis book is a great resource for an Introduction to Qualitative Research. The author has a very personable style that is easy to read as well as understand.

Qualitative Research in Education: A User's Guide, Third Edition continues to bring together the essential elements of qualitative research, including traditions and influences in the field and practical, step-by-step coverage of each stage of the research process. Synthesizing the best thinking on conducting qualitative research in education, Marilyn Lichtman uses a conversational writing style that draws readers into the excitement of the research process.

"In a crowded market of literature on research methods, it is refreshing to find and recommend to students an introductory text on qualitative research that is theoretical and practical, and scholarly yet accessible." (Richard Taulke-Johnson)"The activity sections invite the reader to reflect on what they have discussed, either alone or with a group. As a lecturer who is responsible for research methods teaching and undergraduate and post graduate levels this is a feature that I thoroughly appreciate." (Alexandra Allan) "In a crowded market of literature on research methods, it is refreshing to find and recommend to students an introductory text on qualitative research that is theoretical and practical, and scholarly yet accessible." (Richard Taulke-Johnson)"The activity sections invite the reader to reflect on what they have discussed, either alone or with a group. As a lecturer who is responsible for research methods teaching and undergraduate and post graduate levels this is a feature that I thoroughly appreciate." (Alexandra Allan)About the AuthorMarilyn Lichtman is a retired professor of educational research and evaluation from Virginia Tech at both the main campus in Blacksburg, Virginia, and at the graduate campus in Falls Church, Virginia. After attending The University of Chicago as an undergraduate, she moved to Washington, D.C. She completed all her degrees at The George Washington University, receiving her doctorate in educational research. She taught both qualitative and quantitative research courses while at The Catholic University of America and Virginia Tech. She is a regular user of the Internet and social media and was an early contributor to teaching qualitative courses online. She is currently on the editorial boards of The Qualitative Report and Forum: Qualitative Social Research (FQS), both online journals devoted to qualitative issues. She has served as a consultant to many school systems, private companies, and government agencies. She has traveled extensively throughout the world. Currently she serves on the docent council at the Corcoran gallery of Art in Washington, D.C.
