**Stephen L. Nelson : QuickBooks Simple Start For Dummies** before purchasing it in order to gauge whether or not it would be worth my time, and all praised QuickBooks Simple Start For Dummies:

0 of 0 people found the following review helpful. Out of date By craig claussen2004!!! Need's revision. Does not apply to present Quickbooks online. Therefore it doesn't deserve the right to sell the title name. 2004 is like 20 years ago in today's technology. If you want a book on accounting, buy a book on accounting. This has nothing to do with Quickbooks online. And the more I am grasping the concept, "online" is the way Quickbooks is trying to transform into. Just my two cents. Don't buy it unless you are trying to buy mine that I'm trying to sell used. 0 of 0 people found the following review helpful. Don't buy it if you use a Mac By N. Richards It doesn't specify that it is for Windows. Since I use a Mac, I had to extrapolate. Also, it is far from "simple." Written by a CPA, it is almost impossible to follow. I had to call my CPA to set up my bank accounts. I am winging it with my client invoices. It just doesn't provide what I needed. 0 of 0 people found the following review helpful. disappointed initially By S. Shinneman-Gleave I was disappointed initially because I could not register the software. I reviewed the product negatively; the seller reimbursed me the cost and shipping. I thought that I had edited the review but it remained negative. I would like

to change the review.
