Jennifer A. Moon : Reflection in Learning and Professional Development: Theory and Practice before purchasing it in order to gage whether or not it would be worth my time, and all praised Reflection in Learning and Professional Development: Theory and Practice:

3 of 3 people found the following review helpful. Avoid the Kindle editionBy SnakiestIt is a heavy read, but it is hard to expect more from a book talking about something as vague as reflection. It is not very practical, either, and is written for purely academic rather than pedagogical purposes.The Kindle edition is full of typos, mistakes and wrongly

recognized words (during scanning, I believe). Actually, "full" means unimaginably many in this case. Considering the price tag and the fact that it can only be read on 2 devices simultaneously (I have 5, so it matters to me), I would advise against the Kindle edition.

Reflection is a technique for aiding and reinforcing learning, used in education and professional development. This volume offers practitioners and students guidance that cuts across theoretical approaches, enabling them to understand and use reflection to enhance learning in practice.

About the Author Dr Jennifer Moon is Staff Development officer at the University of Exeter and author of 'Learning Journals', also published by Kogan Page.
