From Asian Development Bank : Regional Workshop on Responding to Climate Change in the Pacific before purchasing it in order to gauge whether or not it would be worth my time, and all praised Regional Workshop on Responding to Climate Change in the Pacific:

ADB's Pacific Climate Change Program will address climate change-related technical and financing needs and support the planning and implementation of the climate responsive national development plans of Pacific developing member countries. Using innovative financing mechanisms, the program will build on and enhance efforts to-date by a variety of development partners, and will work with regional and national agencies and local communities to create and promote knowledge, skills, and practices in climate change-related fields.
