**From Cato Institute : Reviving Economic Growth: Policy Proposals from 51 Leading Experts** before purchasing it in order to gage whether or not it would be worth my time, and all praised Reviving Economic Growth: Policy Proposals from 51 Leading Experts:

0 of 0 people found the following review helpful. Five StarsBy Sidney DuncanI enjoyed reading about the economic

history of the United States. 0 of 0 people found the following review helpful. One Star By Vincent A. Roscelli Very shallow and naive 0 of 2 people found the following review helpful. Having a lot of well-argued views is a big help ... By Customer Having a lot of well-argued views is a big help in deciding what I think... for now. I don't see anything fully convincing, but then I never expected that.

If you could wave a magic wand and make one or two policy or institutional changes to brighten the U.S. economy's long-term growth prospects, what would you change and why? That was the question asked to the 51 contributors to this volume. These essays originally appeared in conjunction with a conference on the future of U.S. economic growth held at the Cato Institute in December 2014. Brink Lindsey, Vice President for Research at the Cato Institute and editor of this volume, is pleased to share this insightful and provocative collection with a new audience. The motivation for asking that question should be clear enough to anyone who has been following the dreary economic news of the past few years. Since the Great Recession of 2008–2009, the U.S. economy has experienced the most stubbornly disappointing expansion since World War II. *Reviving Economic Growth* offers a wide-ranging exploration of policy options from an eclectic group of contributors. Think of this collection as a brainstorming session, not a blueprint for political action. By bringing together thinkers one doesn't often see in the same publication, the editor's hope is to encourage fresh thinking about the daunting challenges facing the U.S. economy—and, with luck, to uncover surprising areas of agreement that can pave the way to constructive change.
