history of our country up until the present, but then goes on to lucidly show how we can evolve/create future in a sane, patient and compassionate manner. Have lived much of history traveled the world and wish his message of evolution of younger generations, with intent and consciousness, will be the change agents that will advocate for US/World peace and prosperity NOT power and greed, as we are now experiencing. All I know, is this too shall pass and hope my wish will come true!

By Kenneth G. Page, LCSWAs a psychotherapist, I tend to be someone who focuses largely on internal change, Dinan's book opened up a new and exciting doorway, finally convincing me that our efforts to participate more fully in the world community are in fact sources of the greatest healing; not just for others but for ourselves. This important book presents a vision of sacred citizenship which is electrifying in its possibility and its challenge. It guides the reader step by step through a new understanding of enlightened activism, and the specific steps each of us can take to become what he calls sacred citizens. I also love his concept of the 2% rule; simply committing 2% of our time, efforts, or profits toward world healing and change is enough to create radical shifts both in the world and in our lives. After reading this book, I felt inspired to sit with my husband and to make plans to act on these principles as a family. This is an essential read for everyone who cares about world change and/or personal growth. As Dinan shows so powerfully, the two are actually one and the same.

By CustomerThe author founded the Shift Network to promote a positive and spiritual shift in human consciousness, and for those of us who want to believe that such a shift is possible and is happening, he has been a pioneer. In this book his focus is on the USA and moving beyond political deadlock. In the early and latter chapters there is a lot of repetition of what the Democrats can learn from the Republicans and vice versa. As a Canadian I found the chapters when he explores possible solutions to specific problems of greater relevance. Even there he is appealing to Americans with a call to become the great nation they could be. The world is a big place and the idea that the rest of the world (think China and Russia) would follow an American cultural lead seems doubtful to me, but no doubt Hollywood has been influential in other cultures, just as yoga has been influential in the west, and the need for a shift from materialistic consumerism is almost worldwide. The book is a call to dream great ideas and implement these dreams in a practical way. Readers who can quiet their critical mind and imagine a better world will benefit from reading this book. The writing is clear, and the call is clear.

Infused with visionary power, Sacred America, Sacred World is a manifesto for our country's evolution that is both political and deeply spiritual. It offers profound hope that America can grow beyond our current challenges and manifest our noblest destiny, which the book shows is rooted in sacred principles that transcend left or right political views. Filled with practical ideas and innovative strategies honed from the author's work with over 1000 luminaries via his company, The Shift Network, Sacred America, Sacred World rings with a can-do entrepreneurial spirit and explains how America can lead the world toward peace, sustainability, health, and prosperity. This vision of the future weaves the best of today's emergent spirituality with seasoned political wisdom, demonstrating ways America can grow beyond its current stagnation and political gridlock to become a world leader in peace and progress. Published to coincide with the party conventions and presidential debates, this book will promote a return to the sacred principles cherished by America's forefathers in order to create a "transpartisan, non-ideological, pragmatic approach to social reform. This uplifting discussion explores evolutions in political leadership, environmental concerns, and economic reformation. It is time to forge a bold new image of America's future. Here is a road map for getting there.

"Sacred America, Sacred World provides an unprecedented vision of global possibilities, based in a frank, but balanced historical background of the greatness, as well as the unhealed wounds, of America. This national and global vision is rooted in the spiritual awareness that we are all members of one human family. Sacred America, Sacred World is a clarion call of hope. It conveys Stephen Dinan's spiritually inspired vision for America's political and cultural evolution. Steeped in the values of the left, he has come to understand an evolutionary vision of cultural change in which both Left and Right play enduring roles in the dialectic of progress, for which both must evolve. He offers an intimate, heartfelt confession of his sacred spiritual intuition in a way that speaks to the highest values of conservatives and radicals alike. Thoughtful, readable, original, and highly recommended!

Terry Patten, founder of Bay Area Integral and author of *Integral Life Practice*

Sacred America, Sacred World could not be more timely. It is profoundly courageous in penetrating the cloud of so-called "realism" that keeps from dreaming a new dream for our country. It inspires and challenges each of us to look at our own beliefs and behavior that make us part of the problem rather than helping to birth the solutions. Stephen is also profoundly courageous in engaging with our greatest moral and political challenges—from income inequality and terrorism to racism and genocide. Both Stephen and his book meet these challenges with that all-too-rare combination of tough-mindedness and open heart.
