Dennis J. Simon : School-Centered Interventions: Evidence-Based Strategies for Social, Emotional, and Academic Success (School Psychology) before purchasing it in order to gage whether or not it would be worth my time, and all praised School-Centered Interventions: Evidence-Based Strategies for Social, Emotional, and Academic Success (School Psychology):

1 of 1 people found the following review helpful. A Must Read for School Based PractionersBy KevinThis book was full of extremely helpful information to assist in the navigation of school based mental health from intervention

strategies to how to most effectively interact with school officials and teachers.

This book presents a practical framework for delivering therapeutic and instructional interventions in schools. Readers will learn how to select evidence-based interventions and make appropriate adaptations for the school context.

The text surpassed my highest expectations by proving to be a superior, comprehensive resource for a school-based practitioner seeking to utilize EBIs with my students and also in terms of its usefulness as a tool for an instructor of higher education. --Communique
About the Author
Denis J. Simon, PhD, is a licensed clinical and school psychologist with over three decades of experience within elementary and secondary schools. For 14 years, he was director of NSSEO Timber Ridge Therapeutic Day School, a zero-reject public program serving the Chicago area. His career has centered on program development and psychological interventions for children and adolescents experiencing social, emotional, and behavioral disorders. Currently, he teaches courses at Loyola University of Chicago on therapeutic interventions, clinical supervision, and consultation for systems change. Dr. Simon is the lead author of the developmental/ecological/problem-solving model of clinical supervision that supports training in evidence-based intervention practices.
