Carl Roper, Lynn, Dr. Fischer, Joseph A. Grau : Security Education, Awareness and Training: SEAT from Theory to Practice before purchasing it in order to gage whether or not it would be worth my time, and all praised Security Education, Awareness and Training: SEAT from Theory to Practice:

0 of 0 people found the following review helpful. book reveiwBy tanya drewWas expecting more training on what to do and how to apply tactics and theory technics, overall a good book to read.

This book is the only one available on security training for all level of personnel. Chief Security Officers (CSOs), security managers, and heads of security forces often have to design training programs themselves from scratch or rely on outside vendors and outside training companies to provide training which is often dry, stilted, and not always applicable to a specific corporate or government setting. This title addresses the theories of sound security training and awareness, then shows the reader how to put the theories into practice when developing or presenting any form of security education, training, motivation or awareness.* Shows how to establish and integrate a structured, internally consistent and coherent program from the ground up * Illustrates how to assess and analyze security program needs and audience and customize training accordingly* Numerous Appendices to help the security manager justify security spending on training initiatives

"This book is, foremost, a study of people, and secondarily, a model for effective security training programs. This is a must-read for every security educator and instructor, and even some human resources professionals. The concepts presented here might just redefine how educators develop and teach their curriculums." Security Management
